# JACK FREIDENRICH, P.E.

(02/23/1922 – 12/26/2006)

Dedicated in memory of Jack Freidenrich, P.E., the longest serving State Highway Engineer in New Jersey history (1971—1988). Jack was a tireless public servant who was recognized nationally by his peers as one of the finest bridge and highway engineers this nation has produced.

Jack's professionalism and leadership guided the creation of the Interstate Highway System in New Jersey, which has had a profound and lasting impact on the quality of life for all New Jerseyans to this day. New Jersey has always been considered an innovative leader in the advancement of transportation. This is due in no small part to Jack's wisdom, expertise and vision.

Jack served the State of New Jersey for 38 years, and continued his affiliation with the engineering profession he loved until his passing in 2006. Throughout his career, Jack was a trusted mentor to countless NJDOT employees and helped guide their career paths to the many opportunities offered in the field of transportation. Many of these employees continue to ably serve NJDOT and the State of New Jersey. The example he set of hard work and integrity remains a benchmark to transportation professionals and public servants everywhere.

We are grateful for the lasting mark Jack made on NJDOT and we respectfully honor and commemorate his many contributions to the State of New Jersey.
